TIAGO NASCIMENTO DE AZEVEDO

Data Analyst | PhD in Physics | Quantitative Finance & Data Science

tiago.phys@gmail.com | +353 831 065 003 | Dublin, Ireland | Visa: Stamp 2 (sponsorship required) | linkedin.com/in/tiagonazevedo | github.com/TiagoPhys

PROFESSIONAL SUMMARY

Data Analyst with a PhD in Physics (stochastic modelling, Monte Carlo simulation, Brownian dynamics) and professional experience delivering quantitative insights in analytical roles. Proficient in Python (NumPy, SciPy, Pandas, Scikit-learn), SQL, Power BI, and Looker Studio. Seeking quantitative finance, data science, and advanced analytics roles across Europe where rigorous statistical modelling and scientific computing add clear business value.

CORE SKILLS

Programming: Python (NumPy, SciPy, Pandas, Matplotlib, Scikit-learn), SQL, Fortran90, LaTeX

BI & Visualisation: Power BI, Looker Studio, Microsoft Office

Methods: Statistical Analysis, Time-Series Analysis, Machine Learning, Monte Carlo Simulation, Stochastic Modelling,

Other: Git/GitHub, Technical & Scientific Writing, Dashboard Design, Research & Literature Review

PROFESSIONAL EXPERIENCE

Intelligence Analyst | Softex — Remote *Jan 2024 – May 2026*

Analysing ICT, Innovation, R&D, and Startup sector data for Brazil's leading technology intelligence programme (softex.br/inteligencia/).

- Built and maintained Power BI dashboards to visualise ICT sector trends, startup ecosystems, and R&D investment flows for stakeholder decision-making.
- Collected and validated data from official government databases and independent sources, ensuring quality and consistency across deliverables.
- Authored technical reports synthesising quantitative analysis, market intelligence, and policy research on innovation dynamics.
- Reviewed academic papers and grey literature to enrich sector analysis with evidence-based findings.

University Entrance Tutor | DCE/UFV — Viçosa, Brazil *2017 – 2019*

- Delivered Mathematics and Physics tuition for competitive university entrance exam preparation.

EDUCATION

PhD in Physics | Universidade Federal de Viçosa (UFV), Brazil *2019 – 2024*

Thesis: Variability in Diffusive Processes with Applications in Microrheology and Cell Migration

- Developed large-scale Monte Carlo and Brownian dynamics simulations in Fortran90 and Python to model stochastic diffusion in complex biological media.
- Applied Langevin dynamics, non-Markovian stochastic processes, and MSD analysis to characterise heterogeneous viscoelastic materials and cell motility.
- Published 4 peer-reviewed papers in international journals; presented research at conferences.

BSc in Physics | Universidade Federal de Viçosa (UFV), Brazil *2014 – 2019*

PROJECTS

Data Analysis Portfolio | github.com/TiagoPhys *2023 – Present*

- End-to-end data projects covering collection, cleaning, exploratory analysis, statistical modelling, and interactive Power BI dashboards — transferable to business analytics and quant research contexts.

PhD Simulations — Stochastic Modelling for Biological Systems | UFV *2019 – 2024*

- Monte Carlo simulations of particle diffusion in heterogeneous media — methodology applicable to financial stochastic modelling (e.g. option pricing, risk simulation).
- Python/Fortran algorithms to process simulation outputs and extract statistical features

PROFESSIONAL DEVELOPMENT

- Data Analysis with Python — freeCodeCamp (300 hrs, 2023)
- Introduction to AI and Machine Learning — UFV (60 hrs, 2022)
- Complete Power BI: From Basic to Advanced — Udemy (10 hrs, 2023)
- Advanced SQL — Kaggle (4 hrs, 2023)
- Master Looker Studio — Udemy (4 hrs, 2023)
- Accenture Data Analytics & Visualisation Virtual Experience — Forage (5 hrs, 2023)

INTERESTS

Business Intelligence | Quantitative Finance & Algorithmic Research | Machine Learning | Cloud Computing
